DETAILED ACTION

1. Claims 1-26 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-26, are rejected under 35 U.S.C. 102(e) as being anticipated by Scott Corey Miller (U.S. Patent No. 6,421,707 and Miller hereinafter).

4. Regarding Claims 1, 3, 7, 9-10, 13-14, 17, 22 and 26, Miller teaches:

creating a user profile (Figure 1, Element 135)

obtaining new information (Col 4, Lines 21-23)

identifying a user profile from the user profile database in response to the new information (Col 2, Lines 65-67 through Col 3, Lines 1-5)

identifying a delivery mechanism having a plurality of delivery vehicles that can be used in response to the user profile (Abstract, i.e. *The subscriber is then notified by the*

network of the message (delivery mechanism) and then delivers the message and any multimedia attachments to the message to the subscriber, according to a delivery indication sent by the subscriber (according to the user profile) to the network; Col 3, Lines 33-38; see also Col 5, Lines 8-12, i.e. providing a number of data services; see also Col 4, Lines 49-51; see also Col 2, Lines 58-64, i.e. Delivery system 160 includes interfaces to a variety of delivery systems; see also Col 3, Lines 16-19, i.e. Converter bank subsystem 180 converts an input into an appropriate delivery format prior to its delivery to the subscriber. The delivery format is advantageously specified by the subscriber)

identifying a default delivery vehicle (Col 5, Lines 1-4, i.e. (or defaulted to, as appropriate)

delivering a notice in response to the user profile (Col 5, Lines 4-5, i.e. when the notification of Radhika's e-mail arrives at Thomas' handset 411).

Regarding Claims 2, 11, 16 and 21, Miller teaches receiving the user profile (Figure 4c; see also Col 4, Lines 41-51; see also Figure 11).

Regarding Claims 4, 18 and 23, Miller teaches SMS (Figure 1, Element 160; see also Figure 4c, Element 410).

Regarding Claims 5, 19 and 24, Miller teaches SMTP (Figure 1, Element 160; see also Figure 4c, Element 410).

Regarding Claims 6, 12 and 25, Miller teaches secure manner (Figure 4a – 4b; i.e. the security option on the top tool bar).

Regarding Claims 8, 15 and 20, the limitations of these claims have been noted in the rejected claim 1, above. In addition Miller teaches memory and processor (Col 3, Lines 53-65).

Response to Arguments

5. Applicant's arguments filed 25 February, 2003 have been fully considered but they are not persuasive.

Applicant argues that Miller does not teach "identifying a delivery mechanism having a plurality of delivery vehicles that can be used in response to the user profile".

Examiner respectfully disagrees. Miller teaches, "identifying a delivery mechanism having a plurality of delivery vehicles that can be used in response to the user profile" (Abstract, i.e. *The subscriber is then notified by the network of the message (delivery mechanism) and then delivers the message and any multimedia attachments to the message to the subscriber, according to a delivery indication sent by the subscriber (according to the user profile) to the network*; Col 3, Lines 33-38; see also Col 5, Lines 8-12, i.e. *providing a number of data services*; see also Col 4, Lines 49-51; see also Col 2, Lines 58-64, i.e. *Delivery system 160 includes interfaces to a variety of delivery systems*; see also Col 3, Lines 16-19, i.e. *Converter bank subsystem 180 converts an input into an appropriate delivery format prior to its delivery to the subscriber. The delivery format is advantageously specified by the subscriber*).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
